

## Letter of Intent

### Participation in the Political Strategic Committee

The European Commission has set a goal to move towards a "European e-Health Area" through cross-border and regional cooperation through the adoption of the e-Health Action Plan:

*"Drawing on best practices and experience from across the EU" is expected to facilitate the move towards a European e-Health Area and the development of common approaches to shared problems.*

Cooperation with international partners and regional forerunners and facilitation of transnational cooperation through health, may lead to innovative and shared solutions in the field of telemedicine, thus contributing to geographical integration among the involved regions.

Therefore, I \_\_\_\_\_, as a representative of

\_\_\_\_\_ ,  
hereby express interest in the e-Health program realized by the European Regional Development Fund (ERDF) project consortium *Support Patients through E-services Solutions (SPES)* coordinated by the Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA).

To support the above action plan I agree to be a member of the Political Strategic Committee and participate at the open meetings organized by the SPES project with other regional bodies to join the framework of discussion.
